

Docket No. F-7948

Ser. No. 10/658,027

**AMENDMENTS TO THE CLAIMS:**

Please replace the claims with the claims provided in the listing below wherein status, amendments, additions and cancellations are indicated.

1. (Currently Amended) A method for the production of individual administration forms, arranged as a multilayered stack, from individual tapes, comprising:

- a) arranging said individual tapes ~~[[to]]~~ into a multilayered strand having a leading end;
- b) aligning and transporting ~~the said~~ multilayered strand to a cross-cutting device, such that said leading end of said multilayered strand is advanced beyond said cross-cutting device;
- c) positioning an empty, pre-opened dispenser having an open side in a filling position downstream of said cross-cutting device, such that said open side of said dispenser faces said leading end of said multilayered strand;
- d) cutting said multilayered strand by means of said cross-cutting device, to sever a multilayered stack from said strand, ~~said stack having a leading end~~ such that said leading end of said multilayered strand forms a leading end of said multilayered stack; and
